

*Hammerhead Resources ("HHR") is a Calgary, Alberta based private exploration and production company focused on the development and delineation of its ~144,000 net acre, contiguous asset base within the light-oil and liquid-rich windows of the Montney formation. HHR's land position is in the heart of one of the most economic plays in North America, and provides sizeable drilling inventory for significant growth potential.*

## Development Engineering Intern

**Student Mentor:** Sr. Development Engineer  
**Location:** Calgary, AB  
**Effective Date:** May 1, 2023

### Primary Accountability:

Reporting to the Sr. Development Engineer, the development engineering intern works in a highly collaborative environment supporting field development plans through both the Corporate Planning & Asset Team arms of the development group. Working amidst a multi-disciplinary group of engineers, geoscientists, and additional supporting staff, this position will be expected to support a diverse array of analyses & evaluations to ultimately steer both small and large-scale investment decisions within Hammerhead Resources. This opportunity also entails direct engagement with the Reservoir Engineering team and additional technical task forces.

### Key Responsibilities:

- Support the optimization of asset development plans through scenario analyses, to align drilling programs with corporate objectives and in support of various executive requests & initiatives
- Perform economic sensitivity analyses to support proposed development plans and understand financial implications under a variety of fluctuating circumstances and market conditions
- Facilitate efficient planning and execution of the well delivery & AFE approval processes, progressing well inventory from conception-stage to drill-ready locations
- Assist in the preparation & summarization of asset development plans and program reforecast updates
- Prepare a variety of development program outputs involving production, capital, well performance, and infrastructure utilization for both internal & external audiences
- Support various initiatives and technical projects as directed by the Asset Teams and neighboring Reservoir Engineering group

### Requirements and Key Competencies:

- Currently enrolled in third or fourth year of a post-secondary engineering Co-op or Internship program (Petroleum, Mechanical, or Chemical preferred) and working towards a Bachelor's degree
- Prior oil & gas industry work experience required. Exposure to upstream business and/or field experience considered an asset
- High degree of self-initiative and a willingness to learn, whilst possessing strong interpersonal & communication skills
- Demonstration of robust analytical & critical-thinking abilities, with a propensity for accuracy and attention to detail
- Advanced capabilities in MS Excel and PowerPoint required, with the capacity to quickly adapt to new software

To apply, please forward a cover letter, and recent transcript (where applicable) along with a copy of your resume to:
