

Hammerhead Resources ("HHR") is a Calgary, Alberta based private exploration and production company focused on the development and delineation of its ~147,000 net acre, contiguous asset base within the light-oil and liquid-rich windows of the Montney formation. HHR's land position is in the heart of one of the most economic plays in North America, and provides sizeable drilling inventory for significant growth potential.

Production/Operations Engineer– Grande Prairie

Reports to: Team Lead, Production

Location: Grande Prairie, AB

Effective Date: ASAP

Primary Accountability:

The Production/Operations Engineer or Technologist will be a part of a team that provides daily support to operations for production management and optimization including coordination of workovers and artificial lift design. Additionally, they will facilitate change processes and integration with cross functional teams for project execution. This position is based out of our Grande Prairie office with the expectation of field time to support operations and project coordination.

Key Responsibilities:

- Manage and provide innovative solutions to maximize base production volumes in the field through downhole or facility modifications;
- Work with Grande Prairie management to set field targets and implement plans for production, operating expenses, safety and environmental improvements;
- Champion the Management of Change (MOC) process to support field change requests;
- Work with Facilities personnel to ensure new production is brought on in a timely manner while minimizing impacts to existing production;
- Provide technical support to the Integrity Management System;
- Ensure that all regulatory compliance requirements are met;
- Troubleshoot process and equipment problems that will provide long term solutions;
- Monitor and implement cost reduction ideas;
- Manage production well servicing operations; and
- Other responsibilities as directed by leader.

Requirements and Key Competencies:

- Professional Engineer actively registered with APEGA or an Engineering Technologist actively registered with ASET;
- B.Sc. in Engineering or Engineering Technical Diploma with 5+ years of oil & gas experience related to Production/Operations Engineering;
- Valid Class 5 driver's license is required;
- Experience with various oil & gas artificial lift and optimization strategies including gas lift, rod pump and plunger lift operations;
- Experience with sweet and sour oil and gas facility operations including separation, oil treating, compression, sweetening and dehydration;
- Must be a strong communicator with strong organizational skills having the ability to work independently and in team settings;
- Strong computer skills are required with proficiency in Microsoft Office, GeoScout, PVR, Valnav, Virtuwel, S-Rod/Rodstar, Ariel Performance and an ability to quickly learn other technical software applications as required; and
- Candidates must live in the Grande Prairie area.
